

# Table of Contents (Volume 2)

July 4, 2022

1. **Global controllability of a class of optimal control problems in 2-Banach Spaces** (1–12)  
Utpalendu Adak and Hora Krishna Samanta
2. **A subset of the space of the double entire sequences** (13–30)  
N. Subramanian and C. Murugesan
3. **Does performance in Mathematics Olympiad reflect the performance in School Leaving Examination result – An investigation through application of Fuzzy Logic** (31–52)  
Karuna Baruah and N. R. Das
4. **Some special class of rational integers in the ring of 2-adic integers** (53–60)  
Raju Bordoloi
5. **A study on Andrus’s method with explicit implicit Runge-Kutta method** (61–70)  
Goutam Sarkar, Sulekha Mukherjee, and Rabindra Nath
6. **On fuzzy soft matrix theory** (71–84)  
B. Chetia and P. K. Das
7. **On a special type of representation of involutive algebras** (85–94)  
Nilakshi Goswami
8. **Dark energy and bulk viscous cosmic fluid in Friedmann universe** (95–108)  
Chandra Rekha Mahanta and Sanjay Sarkar
9. **On some new generalized difference double sequence spaces defined by modulus functions** (109–118)  
Ayhan Esi
10. **On a class of assignment problem** (119–130)  
Sathi Mukherjee and Kajla Basu
