

# Table of Contents (Volume 11)

July 4, 2022

1. **Machine Learning algorithms in correct prediction of negative oil price – A case study (1–12)**  
Abhibasu Sen and Karabi Dutta Choudhury
2. **A note on extension and generalization of ISI index of graphs (13–30)**  
Jibonjyoti Buragohain, Amitav Doley, and A. Bharali
3. **Application of Matlab BVP4X solver scheme in entropy generation analysis of micropolar fluid flow through an inclined channel (31–40)**  
Debasish Dey and Madhurya Hazarika
4. **Jaccard similarity measure of picture fuzzy sets and its applications (41–54)**  
Palash Dutta and Rajdeep Bora
5. **Bianchi type VI, Cosmological model with time varying deceleration parameter in  $f(R, T)$  theory of gravity (55–66)**  
Chandra Rekha Mahanta and Shayanika Deka
6. **Some aspects of Laplacian and adjacent matrix of the total graph associated to  $\Gamma$ -semigroup of  $\mathbb{Z}_n$  (67–78)**  
Pinku Chandra Dey and Kuntala Patra
7. **A comparative study on performance in Mathematics of students of CBSE affiliated schools with respect to some select variable (79–90)**  
Seshanooj Sarkar and B. B. Panda
8. **Buckling of double walled cylindrical shell subject to non-uniform axial compression (91–108)**  
M. Chaudhuri
